FOR IMMEDIATE RELEASE

**STRAGIS IS AWARDED CONTRACT WITH TORONTO TRANSIT COMMISSION (TTC)
Condition Survey – Aboveground and Underground Storage Tanks**

Following a competitive bidding process, Stragis Environmental Services Inc. is retained by the Toronto Transit Commission (Canada) to undertake a City-wide review of all aboveground and underground fuel and chemical storage tanks. The TTC has taken this proactive environmental management approach to provide an inventory of all structures, a condition survey of all tank systems and a remediation strategy, where required.

The TTC serves the city with a grid network of three subway lines, one intermediate capacity transit line, 11 streetcar lines and more than 160 bus routes. 2011 marks the 90th anniversary of the Toronto Transit Commission as a public service in the City of Toronto.

Stragis Environmental Services Inc. provides services in storage tank management ranging from:

- Storage Tank System Registrations;
- Storage Tank Inspections and Monitoring;
- Compliance Inspections and Management;
- Environmental Emergency Plan Development and Training;
- Project Management, Design, and Contract Administration for the installation of new storage tank systems and removal of existing storage tank systems;
- Life Cycle Costing;
- Risk Assessments;
- Feasibility Studies for new Petroleum Storage and Fuelling Facilities; and,
- Training.

Specialists in storage tank (petroleum, propane and natural gas) environmental and asset management, Stragis can provide a variety of services to ensure your storage tank assets are managed in an effective, efficient, and reliable manner which will reduce your company's risk, liability, and costs.

If you'd like more information about this topic, or wish to arrange a meeting with Jim Hartman please contact Jen Swaile at 705-444-8805 ext. 267 or email Jen at jswaile@stragisenvi.com.
